

TENT HEATER

- A) Always have a fire extinguisher within 15 feet of each heater.
- B) Create a 3-foot safety distance between heater-tanks and anything else.
- C) Do not allow items to be placed on top of the heater.
- D) Do not move or sit on the heater.
- E) Do not allow heater to get wet

To Start

- 1) Hook up propane line to heater.
- 2) Hook up electrical connection.
- 3) Turn on propane.
- 4) Turn unit to heat position. (Not fan position)
- 5) Set thermostat

To Shut Off

- 1) Turn unit to off position.
- 2) Turn propane off.
- 3) Unhook electrical connection.
- 4) Unhook propane line.

I will follow all government rules regarding installation and operation of heater.

I fully understand that a heater is a dangerous rental item, and take full responsibility for use and care of the unit. I will not try to fix the heater in any way; and will discontinue use if I feel anything is wrong with the unit. I fully understand these directions

I fully understand Item 15 on the rental agreement

I fully understand that I assume responsibility for running and care of the heater.
